DEMONSTRATING VALUE IN COMMUNITY AND COUNCIL

Community development is an untapped source of economic value. It is not always understood & often perceived as a cost centre in business terms. Redwoods Work Collaborative's priority is to enhance the value of your work and support your teams to promote return on investment via our framework.

DEMONSTRATING VALUE IN COMMUNITY AND COUNCIL

You & your stakeholders are the experts in your community. Together we work on problems & solutions through co-design & collaboration. Let us upskill & resource you so that you can get on with what you do best.

Our work fits in with the Integrated Reporting framework, your Strategy & Sustainable Development Goals framework (<https://sdgs.un.org/goals>).

When working with us, you will be well informed & well connected with support of like-minded people from a range of professions & experience.

"[Redwoods] helped us explore and debate our ideas ... provided research, statistical data and ... case studies to help us decide whether we should proceed any further" GCAIS, 2023
