

NAVIGATING POLITICS & EVIDENCE-BASED DECISION MAKING

You are well connected; you know what the community wants & what management wants. So, how do you create evidence-based & innovative solutions to create meaningful change whilst successfully navigating the political & economic environment? Let us equip you with tools to support effective communication & strong proposals.

HIGH PERFORMING TEAMS

“High performing teams start with a culture of shared values” (Harvard Business Review). Strengthen trust, cohesion, & create an environment for learning with your teams. We help to build skills & experience for clear communication & difficult conversations, ensuring your teams & stakeholders are on the same page.

PLANNING & DEVELOPMENT SESSIONS

Do you & your teams often get stuck in the short-term ‘putting out fires’ loop? Then let us help you work more strategically & support long-term planning. A small investment in time to learn how to embed data & to set up processes will save you time & resources in the long term. You & others will quickly see your value!

HOW TO REFINE, DEMONSTRATE & COMMUNICATE YOUR VALUE

Let us help you work on problems & solutions through co-design & collaboration. Our approach will include the following steps:

-  We will actively listen, define & clarify the issues & challenges.
-  Seek out best practice samples & evidence-based solutions.
-  Co-design a solution with you & your team, determining timeline, topics, resources & learning strategies.
-  Evaluate the process & hand over a Playbook for you to maintain quality, relevance, & best practice.

"Well done, great! Helped spark culture change amongst the teams"

Alex Cauchi, Manager
Communications & Community,
The Hills Shire Council
