

GENERATIVE AI USE, GOVERNANCE, EQUITY AND PROBITY

Redwoods Work Collaborative wants to see communities empowered and well-resourced so that everyone can thrive. We contribute to thriving communities via consultancy, research, and innovative learning projects.

Did you know that Gen Z are the early adopters of generative AI and that many are unsure if their managers are aware of its use? (Deloitte survey, 2024).

GET AHEAD OF THE CURVE!

Let us work with you to unleash your full potential with generative AI and emerging technologies to:

- Adjust your Governance around the use of technology by developing operational strategy and validating accuracy
- Embed evidence-based and best practice
- Access and use generative AI and other emerging technologies to ethically and effectively optimise your work practices and measure success.

Key takeaway?
"Data, Data, Data"

OFFERING 1 TO 1 SUPPORT, WORKSHOPS, CO-CREATION AND DESIGN

VALUE IN COMMUNITY, BUSINESS AND GOVERNMENT

Generative AI utilises data from the Internet, mining big data sources called 'Large Language Models' (LLMs) and making sense of it. Access to large data can support great success, disastrous outcomes, and everything in between. It is essential to use this tool correctly and not rely solely on its outputs.

Sustainable operations requires collaboration, creativity and innovation. You and your team are the experts in your community. Together we work on problems and solutions through co-design and collaboration.

Our work fits in with the Integrated Reporting framework, your Strategy and Sustainable Development Goals framework (<https://sdgs.un.org/goals>).

When working with us, you will be well informed and well connected with support from like-minded people from a range of professions, experience and backgrounds.

REDWOODS TEAM

The Redwoods Work Collaborative consists of a network of creatives, researchers, entrepreneurs and experts in community, business, and government agencies

Tania Krasinski is the Founder and Director of Redwoods Work Collaborative. Qualifications include Executive Master of Business Administration (UTS); Bachelor in Adult Education (Human Resource Development) (UTS)
